#### What's New ...

We are proud to announce an array of new products such as our ground-breaking PCAP Touch Screens with Dual OS (pages 15-16), our new Android Cloud Network Media Player with Live Input (page 18) as well as the addition of a 10" POS

Android Advertising Display (page 20). Our Wall Mounted and Freestanding Infrared Touch Screens now also come with both Android and Windows operating systems pre-installed (page 13). All Professional Monitors (pages 5-6) and the Video Wall Displays (page 11) now come with an even thinner bezel and also feature a brand new IPS panel that offers superior image quality. Using our network solution you can now send content from your PC to your screens in a matter of seconds thanks to our new "Rapid Publishing" tool. Finally, we are proud to announce that all of the products featured in this brochure now come with a full 3 year commercial warranty and lifetime technical support as standard.

#### Designed to Accommodate Your Needs.

Our user friendly Digital Advertising Displays come in a variety of styles and sizes. All of our products are designed for constant 24/7 public usage; achieved by using commercial grade panels and components. This ensures that the ultra-sharp colours don't fade over time, as they would with other panels found in TVs and PC monitors. To protect against potential damage or tampering from the public our Android displays have a mild steel enclosure, a stylish tempered glass front panel, no easily accessible buttons or controls and a locker door to prevent any unwanted updates. They also feature a number of AV inputs for use as a monitor and feature eco-friendly power timers. As we manufacture the screens any pre-production modifications can be made.

#### The Simplicity of Plug and Play.

Thanks to their built in USB media players most of our products use a straightforward plug and play system. Simply load your pictures and videos onto a USB memory stick then insert it into the display, which will copy the files into its internal flash memory. Once you remove the memory stick the screen will then start playing the pictures and videos in a continuous loop. For more advanced requirements the free Scheduling Software included with the screen can be used.

Our Android Advertising Displays and Android Freestanding Digital Poster ranges have a simple plug and play system to manually update content. Their flexible future proof design allows them to be upgraded to an Allin-One Network Display by simply changing a setting on-screen, without the need for any additional hardware. This allows you to remotely update your screen the internet via our cloud-based portal.

For more intricate applications an easy to use piece of free Scheduling Software is included with the standalone Android models, which allows the user to create playlists for different times of the day. For example if the display were to be used as a digital menu board, it could show the breakfast menus in the morning and lunch menus in the afternoon.

### ANDROID ADVERTISING DISPLAYS & **ANDROID** FREESTANDING DIGITAL POSTERS

Integrated Speakers

Scrolling Text Multiple AV Message Inputs

Easy USB Update - Simply load your media onto a USB stick, then plug and play. They require no additional hardware such as PCs, DVD players, excess cables or software.

Tablet-Like Styling - Buttonless tempered glass frontage, rounded corners, super slim profile and aluminium frame all add to their attention-grabbing aesthetics.

Scrolling Text Message - Compliment your content and get your message across.

Constant Use - Commercial grade panel and components provide a wide viewing angle, improved colour, contrast and brightness as well as the ability to be used 24 hours a day.

Free Scheduling Software - Included is simple and intuitive piece of software which allows you to schedule different media and scrolling text to play at different times of the day.

Free Landscape/Portrait Wall-Mount - Included with the wall-mounted models is a free super slim wall mounting plate that allows you to mount your screen in either landscape or portrait orientation.

Use as a Monitor - HDMI and VGA inputs allow you to connect external devices such as a PC or external media player (these can be hidden internally in the freestanding displays).

Upgrade to Network - You can also upgrade your screen to be networked, allowing you to remotely update your screen via LAN, Wi-Fi or 3G with just the flick of a switch and no need for any additional hardware (see pages 20-22).

#### **PROFESSIONAL** MONITORS

Designed for Information Display - CCTV control rooms, rail stations, airports, financial institutions and general public information environments.

Commercial Grade Panel and Components - Using a commercial grade panel with a lifespan of 50,000 hours, and high quality components ensures that the displays can be in constant use 24/7.

Speakers

Automatic Tiling - All monitors 55" and under can be used individually or as part of a budget friendly Video Wall Solution thanks to their built in video matrix processor that does not require any additional hardware.

Commercial IPS Panel - These screens now come with an IPS panel that offers superior colour uniformity, viewing angle and remarkable vibrancy, even when mounted in portrait. These also allow for a super narrow bezel on the display.

Simple Integrated Media Player - As well as having AV inputs, these displays also have a built-in HD media player allowing you to run your images and videos from a USB drive without the need for additional hardware.

Integrated Speakers - Featuring two integrated slimline speakers for applications that involve an audio element.

Eco-Friendly Power Timer - Allows for a reduced power usage in the hours that the displays are not required.

## HIGH BRIGHTNESS PROFESSIONAL MONITORS

Sunlight Readable - Commercial grade ultra-high brightness panels with LED backlight (1,500 cd/m2); more than 4 times brighter than a standard domestic TV to allow easy readability in direct sunlight, making them ideal for outward facing window displays.

Advanced Temperature Control – Internal fans keep the panel and other internal components at the optimum working temperature; ensuring a long and reliable life for your screen even in direct sunlight.

Eco-Friendly Power Timer - Allows for a reduced power usage in the hours that the displays are not required.

Commercial Grade Panel and Components – Using a panel with a lifespan of 50,000 hours, and high quality components ensures that the displays can be in constant use 24/7.

Integrated Media Player - As well as having AV inputs for monitor use, these displays also have a built-in HD media player allowing you to run your images and videos from a USB drive without the need for additional hardware.

Upgrade to Network - You can also upgrade your screen to be networked, allowing you to remotely update your screen via LAN, Wi-Fi or 3G with just the flick of a switch and no need for any additional hardware (see pages 20-22).

Integrated Speakers - Featuring two integrated slimline speakers for applications that involve an audio element.

# OUTDOOR DIGITAL ADVERTISING DISPLAYS & OUTDOOR FREESTANDING DIGITAL POSTERS

Sunlight Readable - Commercial grade ultra-high brightness panels (1,500 cd/m2); more than 4 times brighter than a standard domestic TV to allow easy readability in direct sunlight.

Stylish Outdoor Enclosure - Robust, tablet-style, casing for defence against the elements and the public. With an IP65 rating, it keeps out airborne particles and protects against any wet weather conditions. The enclosures are made from corrosion protected mild steel, have thermally toughened glass and also feature waterproof over moulded AV connectors.

Advanced Temperature Control - Allows the screens to be in constant use in an outdoor environment. Internal fans keep the panel and other internal components at the optimum working temperature; ensuring a long and reliable life for your display. Anti-Reflective Glass - The glass frontage is also anti-reflective to help defuse direct sunlight shining on the display; improving readability..

Integrated Media Player - As well as having AV inputs, these displays also have a built-in HD media player allowing you to run content copied from a USB drive. They can also be upgraded to be updated remotely via LAN, Wi-Fi or 3G using our cloud-based CMS. This is done by simply changing a setting on-screen and requires no additional hardware.

Free Landscape/Portrait Wall Mount – Included with the wall-mounted units is a free wall mounting bracket that allows you to install your display in either landscape or portrait orientation and lock it in place.

Modifications – Whether your project calls for a touch screen, a double-sided display or even a bespoke screen size, we can meet your needs.

## VIDEO WALL DISPLAYS

Commercial IPS Panel - All Video Wall Displays now come with an IPS panel that offers superior colour uniformity, viewing angle and remarkable vibrancy, even when mounted in portrait. Also these panels do not suffer from blackening defect when used as a window display.

Super Narrow Bezel – Create a virtually seamless video wall with a total bezel size as narrow as 3.5mm between displays.

LED Backlight – Offers improved brightness and contrast as well as drastically improving their lifespan and reducing their power consumption.

Automatic Tiling – Built-in video matrix processor allows you to set your video wall up with any configuration without any additional hardware.

Multiple AV Inputs - Powerful interface supporting HDMI, Composite Video, VGA, DVI, RGB/HV and YPbPr.

Air Conditioning - Smart temperature control system allows them to be in constant use.

Eco-Friendly Power Timer - Allows for reduced power usage in the hours that the displays are not required.

#### INFRARED TOUCH SCREENS WITH DUAL OS

Temperature Multiple AV Control Inputs

AV 24/7 Usage

Dual OS - Both Windows and Android operating systems come pre-installed on the screen's internal PC and require no additional hardware.

**Infrared Touch** - These screens use infrared touch technology offering the most robust touch experience available, this ideal for public locations as activating the touch function requires no pressure, incurring less damage over time.

10 Touch Points - Supports up to ten touch points at once, for group interaction.

LED Backlight - Offers improved brightness and contrast, increases their lifespan and reduces power consumption.

**24/7 Usage** - Built with commercial grade panel and components and are designed for over 50,000 hours of continuous use.

Attach External Devices - If you don't want to use the internal PC then HDMI and VGA inputs allow you to connect the display to external devices, also via USB for touch functionality.

Touch Kiosk - We also offer an Infrared touch kiosk that has 6 touch points and can be used with multiple OS's including Android, Windows and Linux.

## PCAP TOUCH SCREENS WITH DUAL OS

Integrated

Speakers

Dual OS - Both Windows and Android operating systems come pre-installed on the screens internal PC and require no additional hardware to run either.

PCAP Touch - These screens have projected capacitive interactive technology that offers the most responsive and sensitive touch experience available, it is also used in smartphones and domestic tablets.

Giant Tablet - Designed to resemble a large domestic tablet with a buttonless edge-to-edge tempered glass front, rounded corners, aluminium frame and a super slim profile these eye catching displays are guaranteed to make an impact. 10 Touch Points - Use the screen in more applications than ever with up to ten touch points allowing you to perform a host of touch gestures, just as you would on a smartphone.

LED Backlight - Offers improved brightness and contrast as well as drastically improving their lifespan and reducing their power consumption.

24/7 Usage - Built with commercial grade panel and components these displays are designed to run over 50,000 hours in constant use.

Attach External Devices - If you don't want to use the internal PC then HDMI and VGA inputs allow you to connect the display to external devices, also via USB for touch functionality.

Transforms your screens into cloud based Digital Advertising Displays that can be updated from anywhere with an internet connection.

Login to our cloud based portal (www.MySignagePortal.com) to upload content, design multi zoned media layouts, create playlists and schedule content.

You can control most of your screen's functions via the CMS, such as playing and stopping content as well as volume control; a truly centralised solution.

Connecting the Android Cloud Network Media Player to your screen, by HDMI or VGA, allows you to update your screen wirelessly (via a Wi-Fi network) or via a Local Area Network (LAN) connection.

No software installation is required, control via our cloud based server.

The screens in your network can all be under one roof or as part of a national or even global network.

## ANDROID CLOUD NETWORK MEDIA PLAYER WITH LIVE INPUT

You can now transform your existing screens into cloud based Digital Advertising Displays that can even feature a media zone for your live television input.

Simply plug your set-top television box, or desired input source, into the Android Cloud Network Media Player with Live Input via HDMI. Then connect the player to your screen via HDMI, you can then manage everything from our cloud based portal (www. MySignagePortal.com). It can even support HDCP protected content.

Design multi zoned layouts to display your TV feed alongside your videos, images, backgrounds, webpages, RSS feeds, scrolling text, time and date.

As well as the ability to schedule your content to play at specified times and dates you can also control most of your screen's functions via the CMS, such as playing and stopping content and even volume control; a truly centralised solution.

No software installation is required, control what your screens display via our cloud based server.

The screens in your network can all be under one roof or as part of a national or even global network.

|                       | OS               | Android 4.2.2  |
|                       | Graphic Engine   | OpenGL ES 1.1/2.0, OpenVG 1.1  |
| Special               |                  | Images, Videos, Audio, Scrolling Text Message, On/Off Timer, On Screen Clock, Media Rotation |
| Included              |                  | HDMI Cable, Scheduling Software, Remote Control, User Manual                                 |

Convert existing displays, such as TVs or PC monitors, into Digital Advertising Displays. Connect the media player to your existing screen via HDMI or VGA. You can then control the content displayed on screen through the media player.

Using a simple plug and play method you can load your media files (images, videos and music) onto a USB stick, plug it into the media player and your content will be loaded onto the internal memory card and will display in whatever order you like.

As well as having a full HD output the Android Standalone Media Player also comes with additional Scheduling Software. This easy-to-use application allows you to define duration times and the order of each media file as well as allowing you to display scrolling text alongside your content.

Message

Easy USB Update - Simply load your media onto a USB stick, then plug and play. They require no additional hardware such as PCs, DVD players, excess cables or software.

Designed for Public Spaces - As well as having a buttonless tempered glass frontage and rounded corners these screens also have an enclosure made from a light-weight polymer so they are ideal for shelf edge and POS displays. They also have a screwless design to achieve a seamless aesthetic and avoid tampering.

Power over Ethernet (PoE) - If you are updating your screen via LAN the screen can be powered using the Ethernet cable, so you don't even have to plug it into the mains.

**Constant Use** - Commercial grade panel and components provide a wide viewing angle, improved colour, contrast and brightness as well as the ability to be used 24 hours a day.

Free Scheduling Software - Included is simple and intuitive piece of software which allows you to schedule different media and scrolling text to play at different times of the day.

RS-232 Remote Control - Once your screen is connected via RS-232 you can control, scale and customise your display remotely over short and long distances.

Scrolling Text Message - Compliment your content and get your message across.

Upgrade to Network - You can also upgrade your screen to be networked, allowing you to remotely update your screen via LAN, Wi-Fi or 3G with just the flick of a switch and no need for any additional hardware (see pages 20-22).

# ANDROID ALL-IN-ONE NETWORK SCREENS

Our Android All-in-One Network Screens have all the necessary networking hardware built-in; making installation a breeze. Other network solutions require you to buy multiple pieces of hardware - making setup and installation much more difficult, as well as the added challenge of concealing all of the extra wires and power leads.

Hardware and software usually come from different sources which can result in confusion and conflict when identifying any potential faults. In contrast to this, any issues with our screens or digital signage software will be dealt with directly by us; one supplier, one solution. Connectivity - These screens have LAN and Wi-Fi connectivity as standard and can even be upgraded to have 3G connectivity. This means that we can provide a fully integrated cloud based solution for any location – even if broadband access is not available.

Cloud Based CMS - Updating your screens couldn't be simpler. Login to MySignagePortal.com from anywhere in the world to upload media, manage playlists, create your own templates and schedule content for whenever you want; giving you complete control over your network. No special software installation or dedicated PC is required.

Tablet-Style Aesthetics - Buttonless tempered glass face, rounded corners, super slim profile and aluminium surround make them the most striking displays on the market. They have the same appearance and specification as the screens in the standalone Android ranges.

Create Custom Layouts - Design your own layouts with different media zones for your images, videos, webpages, time, date and also allows you to add a scrolling message or RSS feed. Add your logo, create branded "skins" and use your corporate colours to maintain brand consistency.

Display a Live Website – The new Android media player allows you to display a website such as a live estate agent property feed or social network profile.

Run Your Own Software – If you already have a CMS solution this can be loaded onto the internal Android media player.

Schedule Playlists - Determine exactly what content is displayed and when. Create playlists that will automatically display your desired content at predetermined times and dates.

Remote Screen Functions - The CMS allows you to control most of your screen's functions from anywhere, such as rebooting your screen, playing and stopping content, volume control and scheduling on/off times; a truly centralised solution.

Manage Your Users - You may wish to limit some functions or zones to specific users; our system allows full user rights control. A log of all of your user and screen activity is also recorded.

Network Management - Check the status of each screen in your network, you can even preview what they are currently playing.
